Corporate Objective

The investment objective of The Scottish Oriental Smaller Companies Trust plc (“Scottish Oriental”, “the Company” or “the Trust”) is to achieve long-term capital growth by investing in mainly smaller Asian quoted companies with market capitalisations of below US\$1,500m, or the equivalent thereof, at the time of investment. For investment purposes, this includes the Indian sub-continent but excludes Japan and Australasia.

This is an abridged version of Scottish Oriental’s investment policy and objective. A full statement of Scottish Oriental’s investment policy can be found on page 3 of the Annual Report and Accounts for the year ending 31 August 2013 (“the Annual Report and Accounts”).

Principal Risks and Uncertainties

Given the nature of its investment activities, the principal risks that Scottish Oriental faces from its financial instruments are market prices (comprising interest rate, currency and share price risks) and credit risk. The principal risks and uncertainties have not changed since the publication of the Annual Report and Accounts. A detailed explanation of these risks and how they are managed is set out in Note 16 on pages 43-45 of the Annual Report and Accounts. As Scottish Oriental’s assets mainly comprise readily realisable securities, other than in exceptional circumstances there should be no significant liquidity risk. Scottish Oriental’s investment portfolio is exposed to market price fluctuations and currency fluctuations which are monitored by the Investment Manager. Scottish Oriental does not invest in either fixed or floating rate securities and interest rate risk exposure is restricted to interest receivable on bank deposits or payable on bank overdrafts which will be affected by fluctuations in interest rates.

Directors’ Responsibility Statement

The Directors are responsible for preparing the half-yearly financial report in accordance with applicable law and regulations. The Directors confirm that, to the best of their knowledge:

- (a) the condensed set of financial statements within the half-yearly financial report, prepared in accordance with the Accounting Standards Board’s statement ‘Half-Yearly Financial Reports’, gives a true and fair view of the assets, liabilities, financial position and profit or loss of the Company; and
- (b) the Interim Management Report includes a fair review of the information required by 4.2.7R of the Financial Conduct Authority’s Disclosure and Transparency Rules (important events that have occurred in the first six months of the Company’s financial year, together with their effect on the half-yearly financial statements to 28 February 2014 and a description of the principal risks and uncertainties for the remaining six months of the financial year). Rule 4.2.8R requires information on related party transactions. No related party transactions have taken place during the first six months of the financial year that have materially affected the financial position of the Company during that period and there have been no changes in the related party transactions described in the last annual report that could do so.

The half-yearly report for the six months to 28 February 2014 comprises the Interim Management Report, the Directors’ Responsibility Statement and a condensed set of financial statements and has not been audited or reviewed by auditors pursuant to the Auditing Practices Board guidance on Review of Interim Financial Information.

By order of the Board

James Ferguson
Chairman

24 April 2014

Performance (Unaudited)

for the six months to 28 February 2014

Net Asset Value	(2.0%)	MSCI AC Asia ex Japan Index (£)*†	(1.0%)
Share Price	2.2%	MSCI AC Asia ex Japan Small Cap Index (£)*†	1.9%
		FTSE All-Share Index (£)*†	8.8%

†Total return (capital return with dividends reinvested).

*An explanation of the Trust's benchmark and comparative indices is given on page 12.

Summary Data (Unaudited)

at 28 February 2014

Shares in issue	31,643,650	Shareholders' Funds	£248.66m
Net Asset Value per share	785.82p	Market Capitalisation	£237.33m
Share Price	750.00p	Share Price Discount to Net Asset Value	4.6%

Interim Management Report

Investment performance

In the six months ending 28 February 2014, Scottish Oriental's net asset value per share declined 2.0 per cent to 785.8p. This compares with the MSCI AC Asia ex Japan Index recording a sterling adjusted decline of 1.0 per cent and the MSCI AC Asia ex Japan Small Cap Index rising 1.9 per cent. The Trust's share price also rose by 2.2 per cent over the period. The Trust's shares traded at a discount to net asset value of 4.6 per cent on 28 February 2014. The Trust underperformed the FTSE All-Share Index, which rose by 8.8 per cent over the six month period.

Scottish Oriental has borrowings of £19.4 million, equivalent to 7.8 per cent of net asset value, as of 28 February 2014. No new shares were issued during the six months under review. The Trust's cash level rose to £36.1m at the end of the period. Its cash position represented 14.5 per cent of net assets. The Manager will continue to invest this money gradually once suitable long term investment opportunities have been identified.

Review

Asian stock markets were weak in the six months ending 28 February 2014. Investor sentiment continued to be influenced by the outlook for the global economy, and specifically by monetary policies in China, the West, and Japan. Stock markets were more volatile as a result. Asian stock markets experienced significant fund outflows, in part because of the perceived cyclical attractiveness of the US and Europe.

India was the best performing Asian stock market. Investors reacted positively to news that the country's current account deficit had narrowed to a four year low. There was also an expectation that the opposition BJP candidate, Narendra Modi, who is perceived to be pro-business, will be successful in this year's general election. Thailand was the worst performing market; the political standoff in Bangkok showed little sign of ending.

Asian smaller companies generally outperformed their larger counterparts with a particularly strong return achieved in India.

Outlook

The near term performance of Asian equities will continue to be influenced by monetary policies globally. Easy money policies may well lead to a sudden inflationary spike. However, at present, deflation, rather than inflation, prevails. The stimulus programme being undertaken is unprecedented and the long term consequences remain unknown. For this reason we are cautious.

The valuations of locally focused consumer companies have become stretched. We are also wary of potential asset bubbles emerging for small companies in certain sectors and countries. Only a small number of companies in the Trust's investment universe offer significant upside over the longer term.

Dividend

A dividend of 11.5p per share was paid on 31 January 2014 for the year ending 31 August 2013 (31 August 2012: 11.0p per share). It is too early to make a forecast of the distribution for the current financial year.

Notes to Accounts

- The position as at 31 August 2013 on page 8 is an abridged version of that contained in the Annual Report and Accounts, which received an unqualified audit report and which have been filed with the Registrar of Companies. This Interim Report has been prepared under the same accounting policies adopted for the year to 31 August 2013.
- The return per Ordinary share figure is based on the net loss for the six months of £1,330,000 (six months ended 28 February 2013: net profit of £64,945,000; year ended 31 August 2013: net profit of £43,393,000) and on 31,643,650 (six months ended 28 February 2013: 30,407,214; year ended 31 August 2013: 31,023,198 Ordinary shares, being the weighted average number of Ordinary shares in issue during the respective periods).
- At 28 February 2014 there were 31,643,650 Ordinary shares in issue (28 February 2013: 31,333,650; 31 August 2013: 31,643,650).

	At 28 February 2014 £000	At 28 February 2013 £000	At 31 August 2013 £000
4 Amounts recognised as distributions in the period: Dividend for the year ending 31 August 2013 of 11.5p (2012 – 11.0p), paid 31 January 2014	<u>3,639</u>	<u>3,324</u>	<u>3,324</u>

Notes to Accounts (continued)

- 5 Under the terms of the Investment Management Agreement, an annual performance fee may be payable to the Investment Manager at the end of the year. A detailed explanation of the performance fee computation is set out on page 21 of the Annual Report and Accounts. The total fee payable to the Investment Manager is capped at 1.5% per annum of the Company's net assets.

Assuming no change in share price, MSCI AC Asia Free ex Japan Index Total Return and shares in issue between 28 February and 31 August 2014, the estimated performance fee for the year ending 31 August 2014 would amount to £745,000. An amount of £372,500 has been accrued in the six months to 28 February 2014.

Information for Investors

Financial Diary

The Company's financial year ends on 31 August. The preliminary results are announced in October and the annual report and accounts are published in November. Any dividend payable on the ordinary shares will be paid in January, on shareholdings registered approximately one month before the payment date.

Capital Gains Tax

An individual tax payer is currently entitled to an annual total tax free gain (£11,000 for tax year 2014/15) from the sale of any shares and other capital assets. Any gain beyond that amount may be liable to capital gains tax.

For initial investors the apportioned base cost of ordinary shares and warrants for capital gains tax purposes is 92.59p per ordinary share and 37.05p per warrant.

Benchmark and Comparative Indices

From inception in March 1995 until October 1999, the Trust adopted the Morgan Stanley Capital International AC Asia ex Japan Index ("MSCI") as its benchmark. No suitable regional smaller companies index was available at that time.

In October 1999 the Directors agreed to the replacement of the MSCI with the SG Asian (ex Japan) Smaller Companies Index, following its reconstitution to cover previously excluded countries. Unfortunately, this Index ceased to be available from the end of 2002.

In 2003 the Directors agreed to revert to the MSCI as the Trust's benchmark. This Index, being dominated by larger companies, is far from ideal as a performance measurement tool. It has, however, the dual merit of being the most widely recognised regional index and of pre-dating the inception of the Trust.

For comparison purposes, the Trust is also displaying the MSCI AC Asia ex Japan Small Cap Index which covers the relevant markets with the exception of Pakistan and Sri Lanka. This Index is made up of companies with a market capitalisation of between US\$0.1m and US\$3,822m. The range is not an exact match to that of the Trust, which has no lower limit and which mainly invests in companies with a market capitalisation of under US\$1,500m. Nevertheless, it gives a useful indication of the performance of smaller companies in Asia over recent years.

As most investors in the Trust are based in the United Kingdom, the Directors consider that it is also relevant to compare the Trust's performance with that of the FTSE All-Share Index.
